
b

CNS tumours — L3
102 methylation subtypes from H&E; prospective routine use; 12 d → 12 min

Autoimmune hepatitis — L3
AUC 0.92 dev. vs 0.74 external; prospective testing

Rare glomerular lesions — L2
Precision −70.3% across domains; up to 63.4% recovery

Paediatric brain tumours — L2
FM linear probes >> ImageNet; H&E + Ki-67 fusion

Paediatric sarcoma — L2
RMS vs non-RMS; alveolar vs embryonal

PTCL — L2
ALCL / TFH / PTCL-NOS; external cohort n = 118

Paediatric / rare cancers — L1–L2
Balanced acc. 0.679, 30 subtypes, 10-shot

B-cell lymphoma — L1
Six-class AUC 0.98; recall MCL 70.8%

Fabry nephropathy — L1
Score separates cases from controls

Ultra-rare entities — L0
No disease-specific validated models
