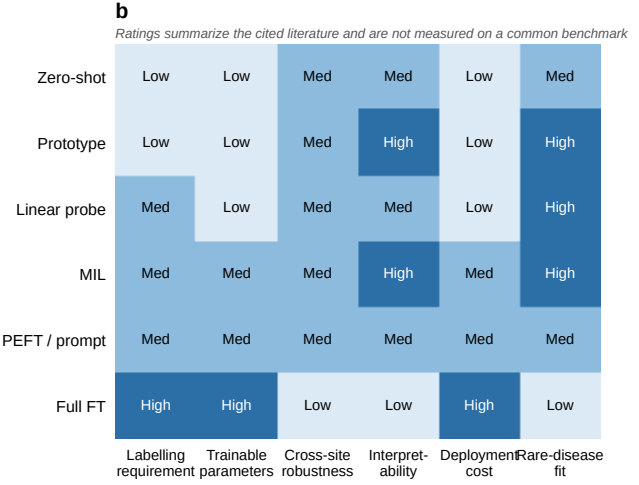
a
Positions are schematic
Full fine-tuning
PEFT (LoRA, adapters)
ABMIL / TransMIL
Prompt tuning
Linear probe
Prototype / retrieval
Zero-shot prompting
Fraction of trainable parameters (log scale)
Labelled cases per class (target disease, log scale)



b
Ratings summarize the cited literature and are not measured on a common benchmark
Zero-shot Low Low Med Med Low Med
Prototype Low Low Med High Low High
Linear probe Med Low Med Med Low High
MIL Med Med Med High Med High
PEFT / prompt Med Med Med Med Med Med
Full FT High High Low Low High Low
Labelling requirement
Trainable parameters
Cross-site robustness
Interpret-ability
Deployment cost
Rare-disease fit
Ratings are author placeholders – confirm against the cited literature
